VINEYARD AND VINIFICATION

Cabernet Sauvignon prefers clayey soils. We use vertical trellis training and Guyot pruning to monitor the growth of our grapes. After carefully inspecting the ripening process, we harvest our grapes at the beginning of August, with an average yield of 8.000 kg/ha. Fermentation takes place in steel tanks at controlled temperature. The ageing is made in steel tanks and then in bottle for at least 3 months.

TASTING NOTES

Grown under the Sicilian sun, this Cabernet Sauvignon has an intense purple red colour. It is a majestic and enveloping wine that boasts marked notes of sage, rosemary, and blueberry.

PAIRINGS

It enhances grilled red meats and aged cheeses and is perfect with broccoli croquettes. Explore our recipes on settesoli.it
